📁 PROFESSIONAL EXPERIENCE

Software Engineer II,

Bayer Science and Innovation Pvt. Ltd. (via HCLTech)

12/2025 - Present

Bengaluru

- Worked on **Agentic AI systems**, building agents to support issue resolution using internal knowledge bases.
- Built **orchestrator agents** to manage workflows across multiple agents.
- Implemented **long-term memory** to retain conversation context and improve continuity.
- Used **Model Context Protocol (MCP)** for context sharing across agents.
- Contributed to platform development and internal tooling improvements.
- Used **Terraform** to manage infrastructure and maintain consistent environments.
- Participated in quarterly innovation sprints, delivering MVPs within 5-day timelines.

Lead Engineer, *HCLTech Ltd.*

04/2025 - 11/2025

Bengaluru

- Built frontend features using **React**, focusing on modular and maintainable UI components.
- Implemented **Module Federation** to support micro-frontend architecture.
- Managed secrets using **HashiCorp Vault** for secure access control.
- Worked with **AWS services (including Amazon Bedrock)** to integrate AI capabilities.
- Contributed to system-wide context handling using **Model Context Protocol (MCP)**.
- Led **Node.js migration (v12/v14 → v24)** across repositories.

Software Engineer II,

Mirafr Software Technologies Pvt. Ltd.

09/2024 - 04/2025

Bengaluru

- Worked on scalable SPAs using **React**, improving performance and usability.
- Managed global state using **Redux**.
- Contributed to **micro-frontend architecture** using Module Federation.
- Integrated **GraphQL APIs** for efficient data fetching.
- Improved code quality by resolving **SonarQube issues**.
- Wrote unit and component tests using **Jest**.

Software Developer,
SL4 Technology India Pvt. Ltd. (Smartlinks)

02/2024 - 04/2024

Bengaluru

- Built responsive web pages ensuring seamless user experience across devices.
- Worked on SPA features using **Angular**, including routing and API integration.
- Contributed to debugging, testing, and improving application stability.

Packaged Application Development Associate,
Accenture Solutions Pvt. Ltd.

01/2022 - 01/2024

Bengaluru

- Worked on web applications using **Angular** and contributed to micro-frontend architecture.
- Developed backend services using **Java Spring Boot**.
- Built reusable and shared UI components.
- Collaborated with designers using **Figma** to implement responsive interfaces.
- Used **Storybook** for component development and documentation.
- Wrote unit tests with **Jasmine** and E2E tests using **Playwright**.
- Participated in code reviews and followed clean coding practices.

PROJECTS

AgentHub, (Agentic AI Platform)

- Built an **Agentic AI system** with multiple agents for task execution and decision workflows.
- Developed support agents to resolve queries using a knowledge base.
- Implemented **Model Context Protocol (MCP)** for context sharing across agents.
- Designed **orchestrator agent** to coordinate multi-agent workflows.
- Implemented **long-term memory** to retain conversation history and improve continuity.
- Implemented **agent-to-agent (A2A) communication protocols** for structured interaction between agents.
- Defined and managed **agent cards** to standardize agent capabilities, metadata, and behavior.
- Worked on creating backstage template to build a platform to provide agents for other teams.

AutoDocs, (AI-powered Documentation System)

- Built an automated documentation system using **LLMs and PocketFlow**, leveraging node-based workflows for end-to-end processing.
- Created **Backstage templates** to standardize documentation across services.
- Designed pipelines to **analyze repositories, fetch code, and process it in chunks** for scalable documentation generation.
- Implemented **node-based workflows** for tasks like repository ingestion, chunking, content generation, and aggregation.
- Used LLMs to **generate structured documentation** from code and project metadata.
- Built logic to **compare generated documentation with existing docs** and update only relevant sections.
- Optimized handling of large repositories using **chunking and incremental updates**.
- Integrated the system with **knowledge base** for easy access and discoverability.
- Automated documentation generation and publishing using **GitHub Actions**.

Faste Lite, (Modular Content Delivery Platform)

- Worked on a modular content delivery platform enabling **module creation, routing, and publishing**.
- Implemented direct routing mechanisms for efficient content delivery.
- Improved modular structure to support scalability and extensibility.

 SKILLS

Languages

- JavaScript, TypeScript, Java

Backend & APIs

- Java Spring Boot
- REST APIs
- GraphQL

DevOps & Cloud

- AWS (including Amazon Bedrock)
- Terraform
- GitHub Actions
- Jenkins
- CI/CD pipelines

Frontend

- React, Angular
- Redux
- Module Federation (Micro-frontends)
- HTML, CSS

AI / LLM & Agent Systems

- Agentic AI
- Large Language Models (LLMs)
- Model Context Protocol (MCP)
- Agent-to-Agent (A2A) communication
- Node-based workflows (PocketFlow)

Tools & Platforms

- Git
- Backstage
- Storybook
- Figma
- HashiCorp Vault
- SonarQube

 EDUCATION

Bachelor of Engineering (B.E), MS Engineering College

08/2017 – 08/2021

GPA: 9.1

Bengaluru

 ACHIEVEMENTS

Star of the Month, *Recognized for outstanding performance and dedication, awarded the prestigious "Star of the Month" at Accenture.*

Agile Practitioner,
Received certification for Scaled Agile Framework Practitioner.

NPTEL,
Received Elite+Silver certification from NPTEL in Programming in C and Java.
