SUMMARY

Experienced Database Administrator with 4.6+ years of expertise in Oracle 19c, DBMS, and Exadata. Specializes in performance tuning, backup/recovery, and high-availability systems. Proficient in tools like Apica (External, Internal, Dynamic), GBT Dashboard, Grafana, ServiceNow, Java and Networking Support, BigPanda, Jira and PagerDuty.

WORK EXPERIENCE

Senior Technology Support Executive (Oracle DBA)

Oct 2023 - Present

Infosys BPM, Bengaluru, Karnataka

- Utilized DBMS and ORMB to design and manage databases, ensuring data integrity and performance.
- Used Grafana to monitor system performance and visualize application metrics through dashboards.
- Worked with Java applications and supported basic network troubleshooting and system connectivity
- Developed proofs of concept for innovative solutions, enhancing system functionality.
- Tested and debugged code and database objects to maintain stability.
- Created custom database objects and stored procedures to support applications.
- Troubleshot Oracle Database and Exadata issues in production and development, minimizing downtime.
- Provided L1/L2 software support, ensuring swift incident resolution.

Technology Support Executive

Dec 2021 - Sep 2023

Infosys BPM, Bengaluru, Karnataka

- Applied strong understanding of operating system-level implementation, optimizing technology across server and network areas.
- Increased productivity using automated build and deployment pipelines.
- Conceived and built optimized queries.
- Performed unit testing of web applications and troubleshoot issues.

PROJECTS

Morgan Stanley

Apr 2023 - Present

- **Incident Management with PagerDuty:** Managed incidents proactively to minimize downtime and ensure quick resolution.
- **NBA Launch and Task Assignment:** Launched NBA and managed task assignments via I2E and Salesforce (SF) for efficient C2C workflows.
- **Deadlock Resolution and Prevention:** Resolved deadlocks in critical processes, boosting system stability.
- **Database Recovery and Backup:** Implemented strategies for backup and recovery, ensuring data integrity and uptime.
- **User Shadow Permissions:** Managed secure temporary access for new users, maintaining compliance with security policies.
- **System Monitoring:** Utilized CheckID for user authentication and access validation, handling failure statuses by triggering alerts and enforcing re-authentication protocols.
- **Log Analysis:** Employed Splunk to analyze logs and monitor system health, setting up automated alerts for critical error codes to prompt immediate investigation.
- **Job Scheduling:** Managed Autosys jobs with proactive monitoring of job status codes, implemented retry mechanisms and escalations on failure (e.g., non-zero exit codes) to ensure job completion.
- **Application Management:** Administered Solr cores and App Pool, monitoring status codes

and service health, applied automated restarts or failover procedures on service disruptions to maintain uptime.

- **Wealth Management Command Centre:** Monitored and managed real-time wealth management operations, ensuring SLA compliance and minimizing risks through proactive incident detection and resolution

Bank of Chicago (Northern Trust) (SQL, ORMB, PROD ENV-19C)

May 2022 – Nov 2022

- **GFB Support at Northern Trust:** Delivered end-to-end support for critical Global Fee Billing Services, ensuring high availability and seamless operation of financial workflows in a high-stakes environment.
- **Adoch Request and ServiceNow Management:** Streamlined ITSM processes by efficiently managing Adoch Requests and leveraging ServiceNow for incident tracking, SLA adherence, and change management.
- **Batch Management and Payment Cycle Oversight:** Orchestrated batch executions and monitored payment cycles, achieving 99.9% on-time transaction processing and compliance with SLAs in a production setting.
- **Supporting Roles Expertise:** Executed log analysis, smoke testing, creation of Change Requests (CHG), and routine maintenance activities, contributing to proactive issue prevention and system reliability.
- **Database Administration and Optimization:** Administered and fine-tuned Oracle 19c databases, employing advanced SQL tuning, indexing strategies, and resource management to boost query performance by 30%.
- **Performance Monitoring and Troubleshooting:** Spearheaded in-depth performance diagnostics and root cause analysis, reducing critical incidents and system downtime by 25% through rapid resolution and optimization.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science

2017 - 2021

Visvesvaraya Technological University, Bengaluru, Karnataka

Higher Secondary Education

2014 - 2016

Bihar School Examination Board, Ara, Bihar

SKILLS

Languages: C, Java

Operating System: Linux, Windows

Databases: Oracle, MySql

Applications: Apica (External, Internal, Dynamic), GBT Dashboard, Grafana

Ticketing Tools: ServiceNow, BigPanda, Jira, PagerDuty

Other Skills: Capacity Planning, Disaster Recovery

Others: Java Support, Networking Support and Incident Management

ACHIEVEMENTS

- Optimized SQL queries, reducing data fetch time by 30%, which decreased client interface load times.
- Recognized for quickly adapting to a complex project environment and significantly contributing to project success, awarded by management for outstanding performance.
- Enhanced deployment speed using CI/CD pipelines, improving efficiency and speed by 40%.
- Received the Outstanding Badge for exemplary work performance on the Morgan Stanley project.

LICENSES & CERTIFICATIONS

- Certified for Cybersecurity.
- Certified for Large Language Models (LLM) from Google Cloud Skill Boost
- Certified for Generative AI from Google Cloud Skill Boost
- Certified for Applying AI Principles from Google Cloud Skill Boost

STRENGTHS

- Good Problem-Solving Skills
- Time Management
- Passionate about Technology
- Customer Centric
